EDUCATION

Bachelor of Technology in Computer and Communication Engineering

2023-2027

Amrita Vishwa Vidyapeetham University, Coimbatore

CGPA: 7.17

- **Relevant Coursework:** Data Structures & Algorithms, Operating Systems, Machine Learning, DBMS, Embedded Systems, IoT and Cloud Computing, Computer Networks, Generative AI

EXPERIENCE

Junior Software Engineer Intern

April 2026 – May 2026

Elverve Technologies

- Gained practical experience in full-stack web development, working across both frontend and backend layers using React, Python Flask, SQLite, and MySQL; built RESTful APIs with AWS Cognito authentication and protected routing.
- Developed professionally by working and communicating with senior developers, understanding existing systems, and contributing meaningfully to real projects.

TECHNICAL SKILLS

Programming Languages	C, Python, JavaScript, HTML
Frameworks & Libraries	React.js, Express.js, Node.js, Pandas, Flask, TensorFlow, Scikit-Learn, NumPy, SQLAlchemy
Tools & Technologies	AWS, MySQL, MongoDB, SQLite, Postman, Git, Docker
Embedded & IoT	Arduino, ESP32, MQTT, Node-RED, Blynk
Technical Skills	CI/CD
Interests	Web Development, Cloud Computing

PROJECTS

StartSmart – AI Startup Evaluator | MongoDB, Express.js, React.js, Node.js, GPT 4o API

GitHub • Demo

- Built a startup funding platform connecting entrepreneurs with investors, featuring AI-powered idea analysis, automated funding requests, real-time negotiations, and comprehensive notification systems.
- Designed role-based dashboards with portfolio analytics, market research tools, ideathon competition management, idea comparisons, and admin analytics for monitoring platform growth and user engagement.

Document Management System | React.js, Flask, MySQL, Mistral OCR, OpenRouter API

GitHub

- Built a document management platform with native PDF/DOCX rendering and full version control with history.
- Integrated Mistral OCR for scanned document extraction and OpenRouter LLM API for AI-generated semantic diff summaries between document versions.
- Enforced three-tier RBAC with granular permissions, an audit trail exportable to CSV, and an email notification pipeline.

Music Genre Classification | Python, Librosa, scikit-learn, TensorFlow

GitHub

- Built a music genre classifier extracting features (MFCCs, chroma, spectral contrast) using Librosa.
- Optimized accuracy by training SVM, Random Forest, and CNN models.
- Achieved high prediction performance validated by confusion matrices and evaluation metrics.

Library Management System | Python, Tkinter, Pandas, OpenPyXL

GitHub

- Built a library management system with a GUI using Tkinter, featuring book inventory tracking, member management, issue/return records, and fine calculation.
- Persisted data to Excel files and logged all transactions.
- Developed an intuitive multi-frame GUI for both administrator and user modes.

CERTIFICATIONS

AWS Certified Cloud Practitioner CLF-C02
